

CRITICAL MASS JUNE 2018

Critical mass was epic once again. Everyone blocked the roads at Piccadilly circus.

There was a lot of people this month. The good weather and late sunset made lots of people come out.

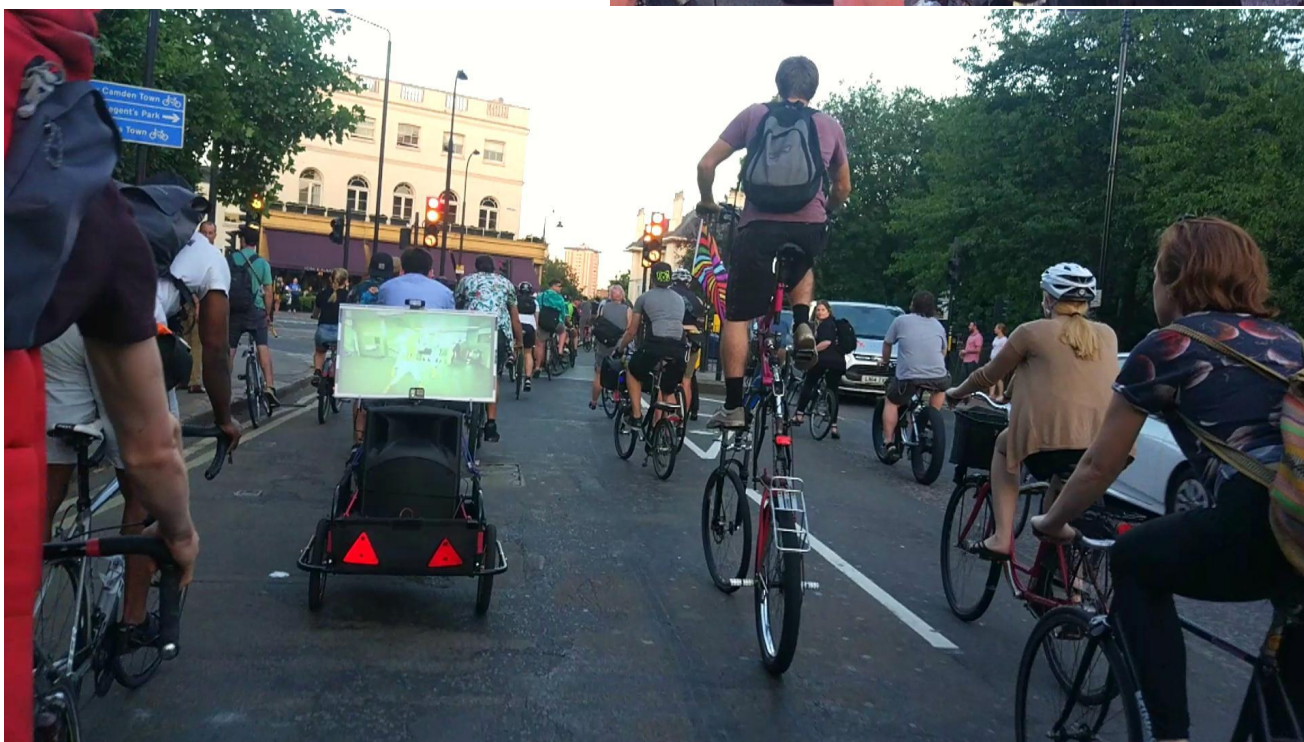

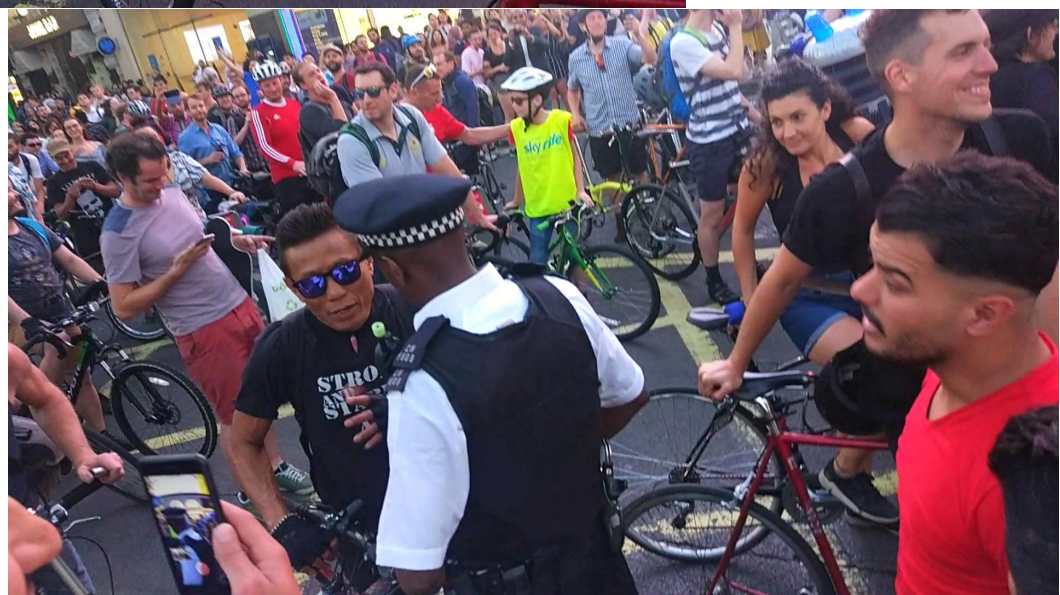

The ultimate protest is to sit in front of a bus!

The Piccadilly Circus roadblock was very fun.

The police were not able to do anything to stop us. They were powerless! This must have really hurt their egos!

The guy on the right with the epic tall bike is a regular, but this is the first time I have seen a TV on the back of a bike. That must have been heavy!

LUKE'S DRONE SHOTS

Testing out the dji mavic pro.

This drone has a crazy number of sensors and stabilization features.

It glides through the air unaffected by gusts of wind.

WAYGOODOTIS'S PAGE

Tranzurban has finally commissioned their brand new Optare and Scania buses in Wellington taking over NZBus's Hutt Valley routes

Friendly Driver waves at me on the second day of service!

Brand NEW Scania Bus operating the 110 to Upper hutt from Petone Station

Rest in peace Valley Flyer in the Hutt, Some MAN SL243's have been sold to NCS but some have not be so lucky and probably will be scrapped

Brand NEW BCI Double
decker
buses fresh off the boat
from..

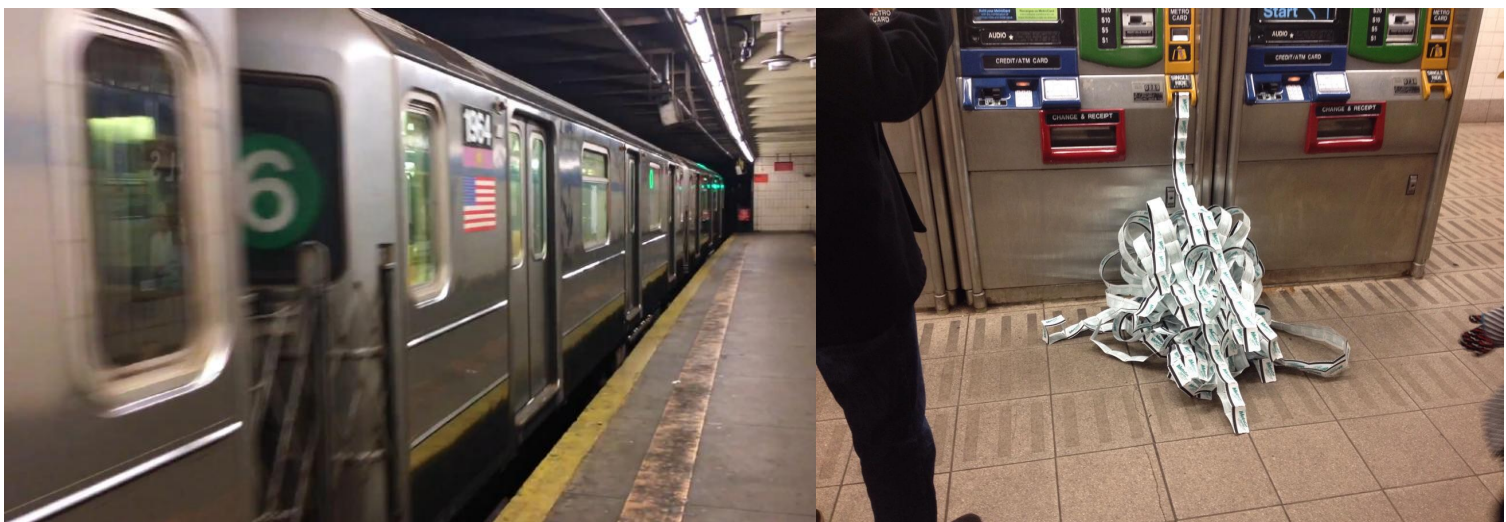

CHINA, Not a big fan of
Chinese buses but they are
better than what they were
but wished they went with a
european brand such as Man
Volvo or Scania and had
them assembled here

LIAM'S PAGE

Nothing at all related to things in Europe. This page talks about the transportation system in NEW YORK, USA! There are also many awesome lifts such as the Schindler Miconic 10 lifts at the New York Marriott Marquis in the center of Times Square, Manhattan!

We also have one of the most chaotic subway systems in the world also known as the New York City Subway! Here are some photos:

I also happen to have one of the most unreasonable collection of metrocards!

SOMEBOWIE'S PAGE

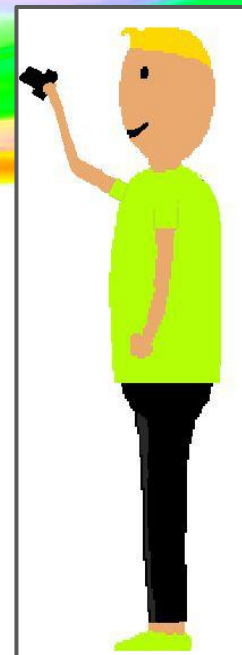

Hello. Welcome back to the Somebowie Story Section. Yes, I had to make em all start with S. Decent story this time, ready? Get cozy, a snack or something. You know, hope you enjoy.

It was a cold, dark winters night. Not even a footstep to be heard, but in the centre of a local shopping center, an Otis Gen 2 can be heard struggling to go at a decent speed. Something needs to be done.

On that fateful night, it was going to be replaced with an actually decent lift, an Ecodisc! But before that, the Otis bin 2 (as I'll call it from here), needs to be surfed, as a farewell to the trash. It was a job for...lift surfing man!

He wore a black tracksuit for the easiest way of accessing lift tops in comfort. His head masked, as a way of making sure he was never recognised. All around the Lift Creating HQs, he was a wanted man.

BEN'S PAGES

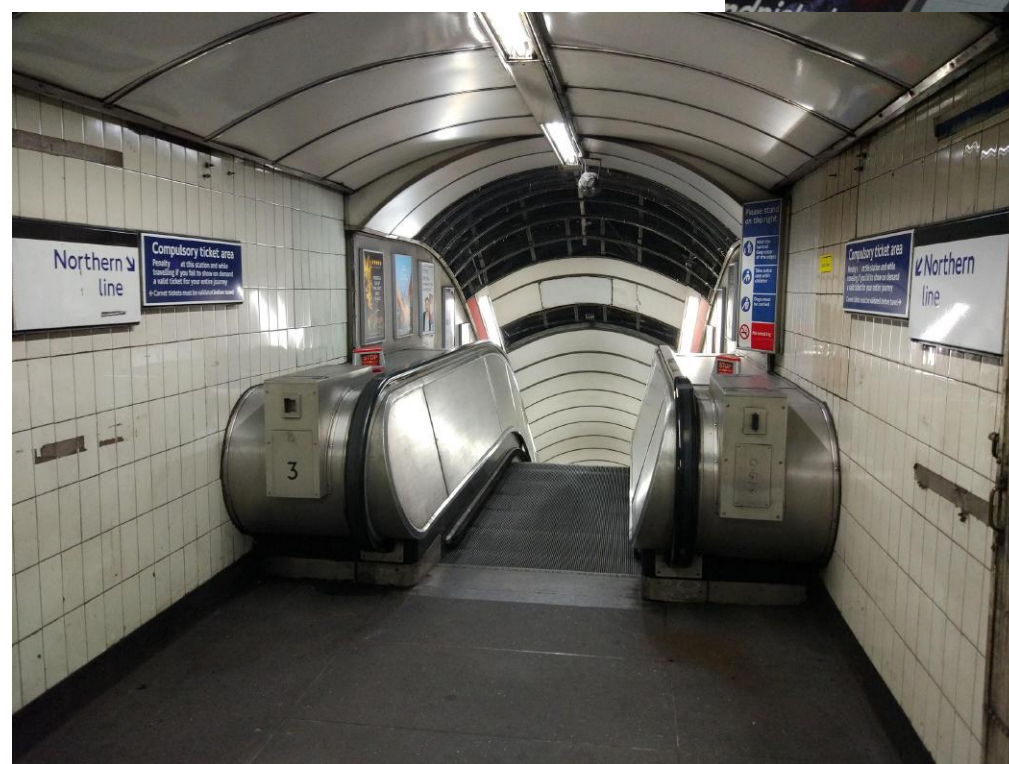

Bye bye 172 Turbostar

Not many years ago I went here to ride the first one in service. Now they are already being withdrawn, because they are electrifying the line. It feels rather strange. Also the ZF gear changes have improved since they were new as there was a major design flaw with the exhaust system.

This is my first time that I got the very last train of the day on the underground. It was quite a weird experience.

I still find this escalator at Moorgate station weird. It is a single escalator from the Northern city line to the Northern line.

The escalator in traveling downwards, and there is no upwards escalator to be seen.

CHEAP FLIGHT ADVENTURE TO GENEVA

I went on a cheap flight adventure to Geneva in Switzerland.

There were loads of epic Schindler's everywhere to be seen.

There is a very interesting selection of Trolleybuses. Some of them were double bendy buses.

The one pictured here is a very modern one that looks like a tram.

LITTLE SCHINDLER M SERIES

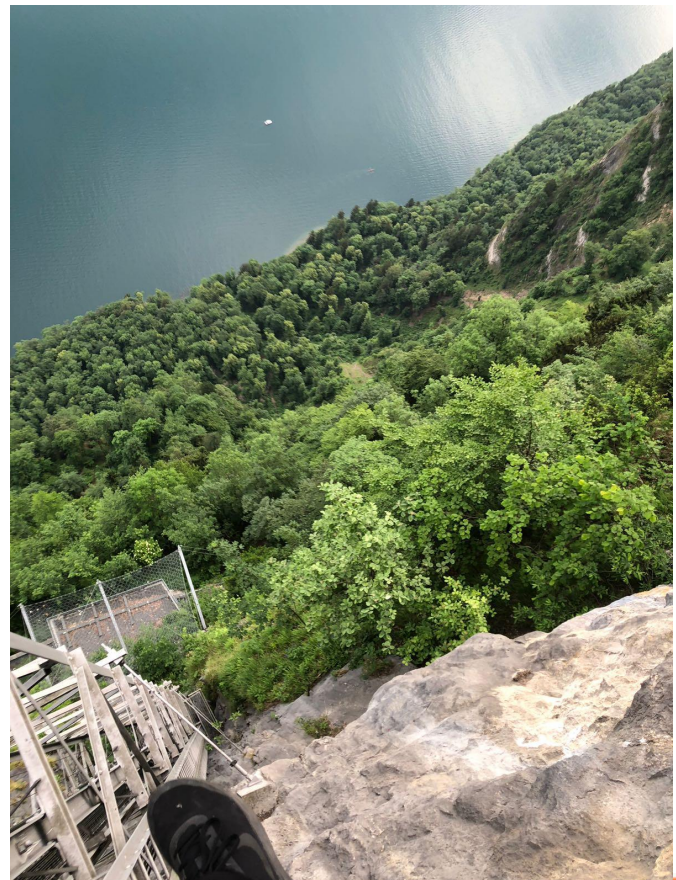

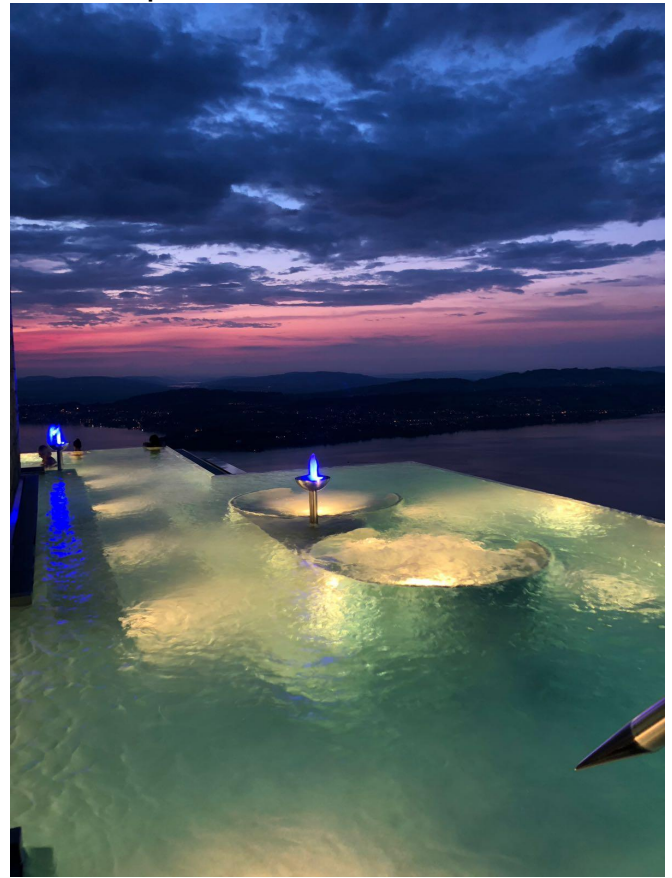

This little lift in Switzerland only goes between the car park and reception, in most places this would have been some cheap thing. But over here it is a full intellegent Schindler M series.

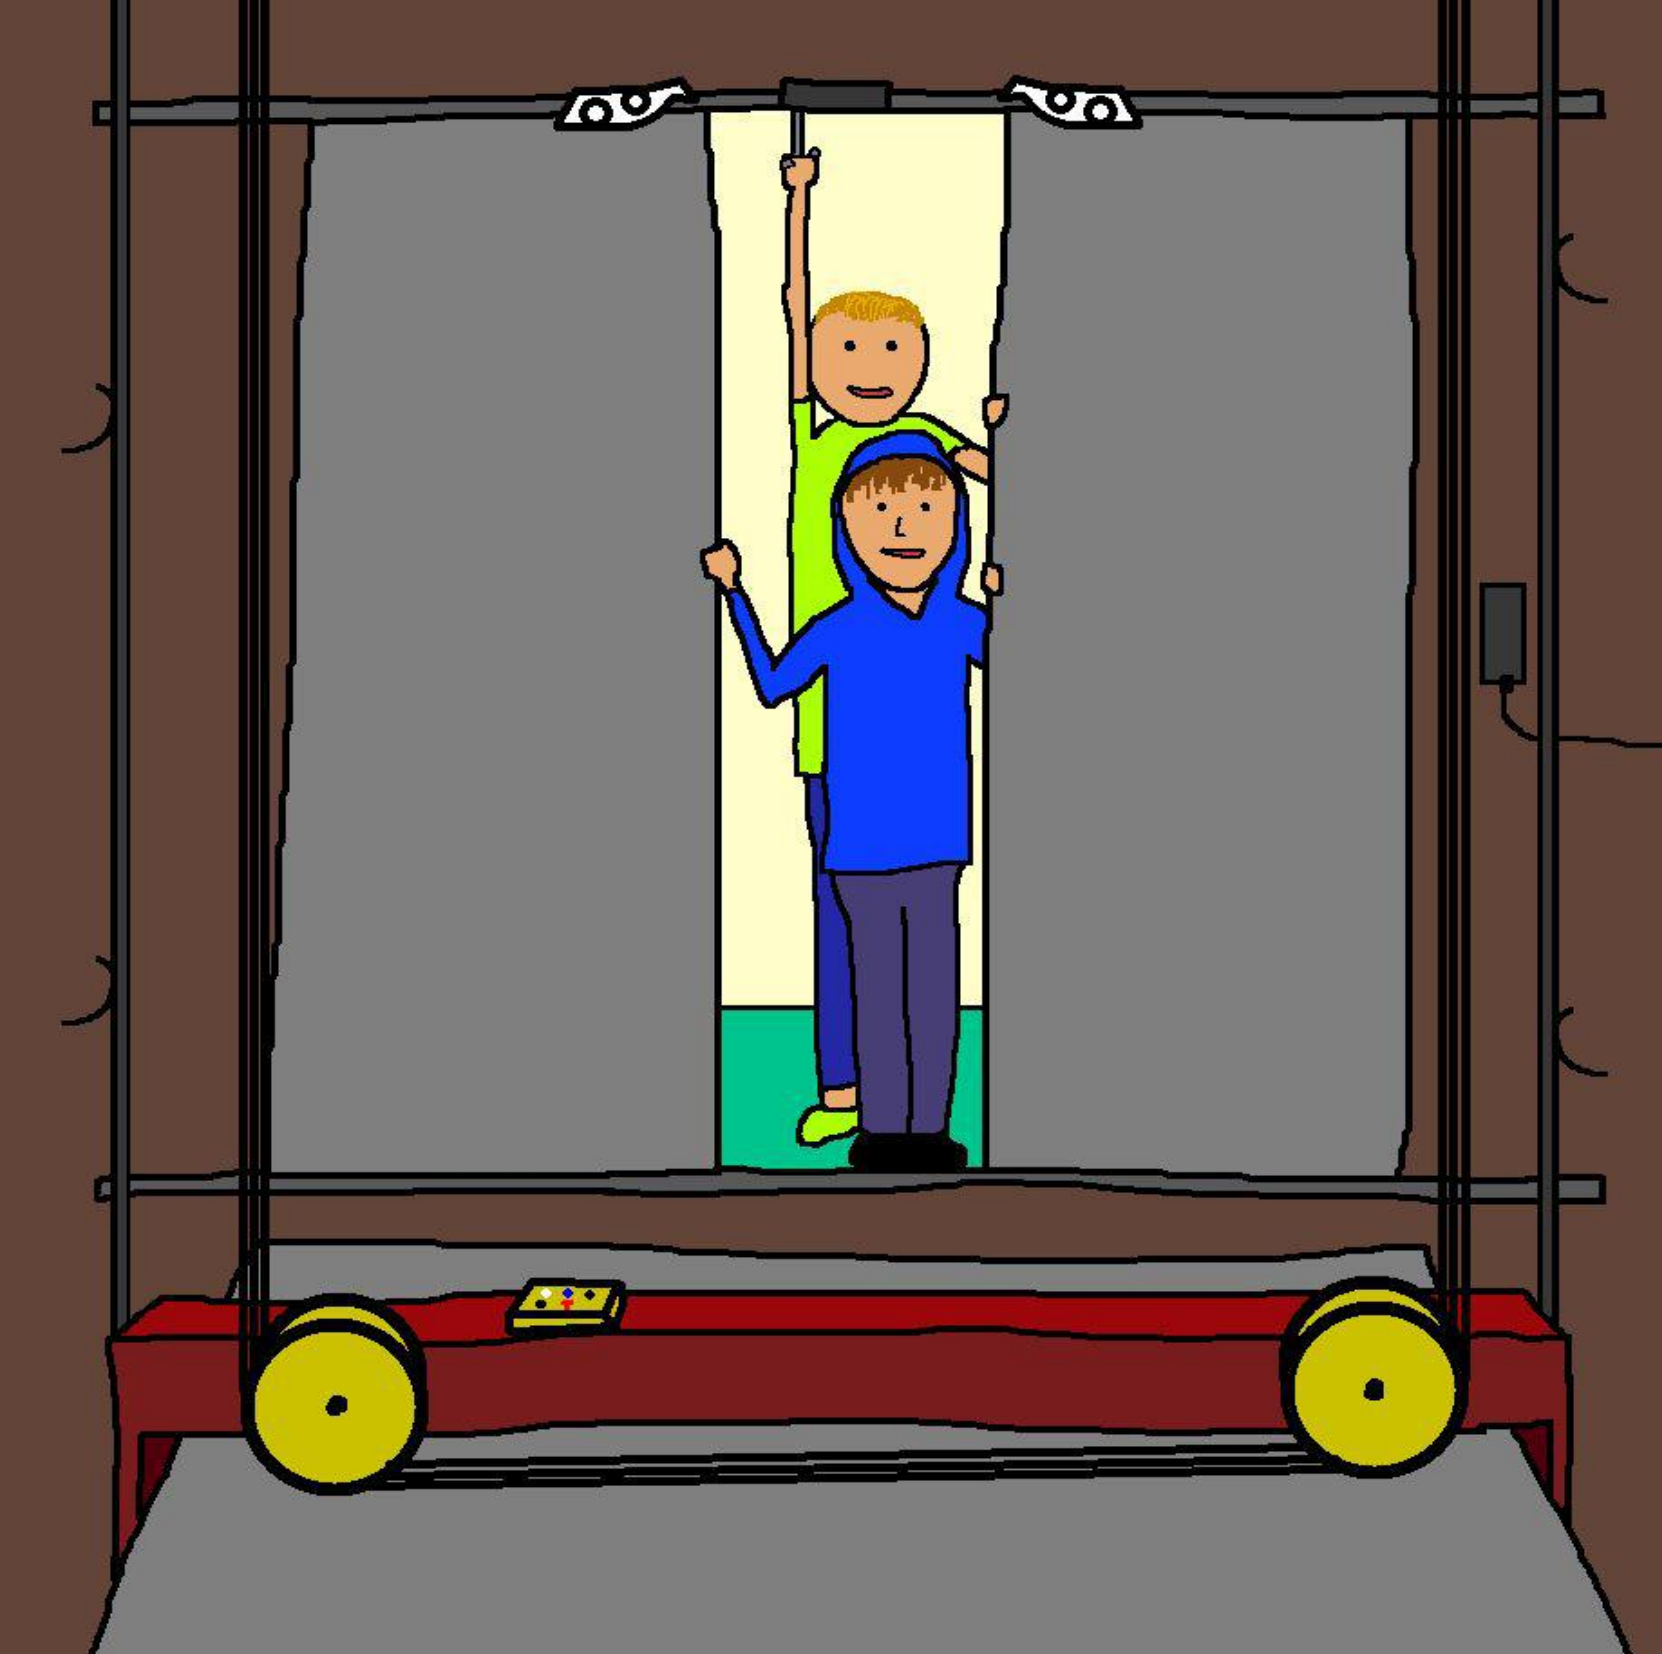

ADVENTURE ACROSS SWITZERLAND

We went on an epic adventure across Switzerland. Dylan and Urban Odyssey climbed the Hammetschwand lift. And we sneaked into some very posh swimming pools. We did the adventure as cheap as possible by sleeping in random places we found instead of paying for hotels!

THE END
