Challenge question of the month ANSWER

How to insert a 70 cm IV line from under the elbow so the line ends in a large vein that doesn't get irritated beyond the shoulder near the heart (for medium term IV usage)

1. Open the gloves. Drop the sterile items into the packaging of the gloves BEFORE you put the gloves on. This must be done so your dirty hands only touch the packaging of the items, and the items themselves drop cleanly onto the glove's packaging not touching anything else.
2. Put on gloves
3. Clean area where line will go with alcohol.
4. Use filter needles to fill syringes with saline and heparin
5. Fill the line and extension with saline
6. Put the plastic needle around the outside of painful needle
7. Put metal needle into patient. Make sure it goes into a large vein. Loads of blood should come out the needle to show it is in the right place.
8. Push the plastic needle into patient around the big needle, and remove the big needle leaving the plastic needle in the patient.
9. Push the entire IV line into the patient slowly, then remove the metal wire from inside the line
10. Remove the plastic needle and then break it in half to remove it from around the line.
11. Connect the line extension to the line. This is so all the usage of line end wears out the extension (instead of the line itself) which can then be replaced.
12. Flush the line with saline. Start slow, but then you should be able to push it fast without it hurting.
13. Fill the line with heparin to stop a blood clot forming where the blood touches the saline at the end of the line.

1. Filter needle
2. Syringe
3. Heparin bottle
4. Saline bottle
5. Plastic needle
6. Metal needle
7. IV line
8. Line extender
9. Alcohol cleaning swab
10. Alcohol wipe
11. Gloves
12. Glove packaging used as sterile area

WHO IS THE MOST EVIL?

Theresa May.
Does not have a clue what an IP address is but doesn't stop her sounding like the worst sort of school teacher who thinks she knows best. Didn't consult anyone on her brexit negotiations. Completely ruined the country. Acts completely emotionless so nobody has a clue what she is doing, but does whatever she wants like a self entitled cunt.

Nick Mellor.
Hates anyone who surfs lifts. Forces lift companies to obey his silly LEIA nonsense. Loves generic lift companies.

Hates anyone who surfs lifts. Used to work for Express but is against everything Express stood for. Ran a magazine that loves cheap nasty generic lift companies.

Tony Blair.
Conservative in descise. Forced the country to the right while pretending he was the left. Arse licked george bush. Just don't think about the number of people killed in iraq due to him.

Boris Johnson.
Pretends to be a buffoon which conveniently allows him to not be held to the same level of criticism as his rivals. Wrote two separate Brexit speeches. Suspended parlement. Anti democratic.

Donald Trump.

How on earth can he be president of the USA.

S [REDACTED] BREAK IN & CAR STOLEN

On Tuesday 26th our Audi S3 was stolen from our drive on [REDACTED] after a break & entry to get the keys. Be vigilant & please let me know if you have any information. We're absolutely devastated.

Car is Navarra blue metallic, 3 door, [REDACTED] (reg will be different by now though I bet). I have reported this information to the police.

I would never own such a overpriced car. Cars are pritty much the same mechanically no matter what your budge is. There all cheap money pits and the fact you had the money to purchase such a vehicle just shows how much of a show off and cunt you are. You clearly had the money to get a gps tracking security system installed but you were too lazy to get one installed. What an arsehole you are

Some nabour of mind put a note through my letterbox asking me to join a local community forum. The forum was full of neighbours complaining about nonsense. So I decided to troll them.

Dog mess

There are still people about who for some unknown reason do not clean up after their dogs. Twice in the last two days we have been poeed at the top of our drive - same colour, same consistency and same amount = Same Dog !! I am watching and when I see you it will be reported to the police and cost you money. I can't print what else might happen you moron - be careful - be very careful !!!

A few lift motor rooms I have visited this month

1998 Schindler M-Series

1972 Leonard
Peters Aufzüge

New Osmo
MRL

URBEXLIFTS

GLASS LIFT SURF IN A SHOPPING CENTER

The top floor of this lift is rarely used office entrance so it was the best place to get on and off

I managed to put it on inspection without having anyone in the lift

Nice view of the centre from on top the lift

A blue hydraulic cylinder with a white label that reads "GEDA 500 Z/ZP". The cylinder is mounted on a metal frame. A yellow label with a black "X" is visible on the side. The background shows a building with a staircase.

Trizo's page!

Apologies if you already heard some things here and there, but I have been too lazy the past time to actually do pages on here. Now I have time and I decided to do them now!

MY PLACEMENT

I had a placement at a major German cleaning products company. I looked into the job of the electrical engineer and also had lots to do with lifts. Here are some photos of the (mostly original 50s) lifts.

Small innerdoorless goods lift

Large 50s BAAS Motor room

The BAAS Lift itself. No cartop controls, but a Long metal rod used to unlock doors

Panel they rescued out of the skip when A building got pulled down

Trizo's 2nd page!

Some floor selection wheel they also rescued

That's what I call a lift alarm!

Anti-explosion lift fixtures

This epic abandoned lift is gonna
Be gone by next year

Don't blow compressed air
Up your arse!

This epic relay lift started malfunctioning after a power cut
But luckily I managed to fix it on my own!

Oops! This lift ran into the
End switch

Trizo's 3rd page!

TRIZOCBS ELEVATORS

I have finally released the german version of my website of my lift company, Trizocbs Elevators! Link can be found here: <https://sites.google.com/view/trizocbselevators/>

We always aim for better and longer-lasting lifts! Our exclusively custom lifts are equipped with High-Quality hand-picked components and are guaranteed to run for at least 50 years!

The screenshot shows the German version of the Trizocbs Elevators website. The header includes the company name and navigation links. The main content area is titled 'Features unserer Steuerung' and displays four key features with corresponding images: 'Zusätzliche Sicherheit' (Additional Safety), 'Geringe Wartezeiten durch hohe Effizienz' (Low waiting times due to high efficiency), 'Eigene Bandansagen möglich' (Own voice announcements possible), and 'Anzeige der nächsten Zielstockwerke' (Display of the next destination floors). Below these, there is a section titled 'Sicherheit' (Safety) which includes a list of safety features and a warning sign that reads 'Vorsicht - Aufzug!' (Caution - Elevator!). The warning sign also mentions 'Tragfähigkeit: N Personen oder N kg / N lbs' and 'Aufzug bei Alarm und Feuer nicht benutzen!' (Do not use elevator in case of alarm and fire!).

LIFTSNETWORK : SKYSCRAPERSIM

As the original skyscrapersim forum shut down, a former moderator decided to re-do the forum by using nothing but an out-of-the-box forum solution that looks ever so generic, boring and bland! Rules on this forum discriminate against people younger than 18 for no reason! I opened my own forum and gave it lots of custom features, looks and perks. As of 9/8/19, 70+ members are already registered. Link <http://trz.mooco.com/skyscraperforum>

Why the other forum is so bad.

BEN'S PAGES

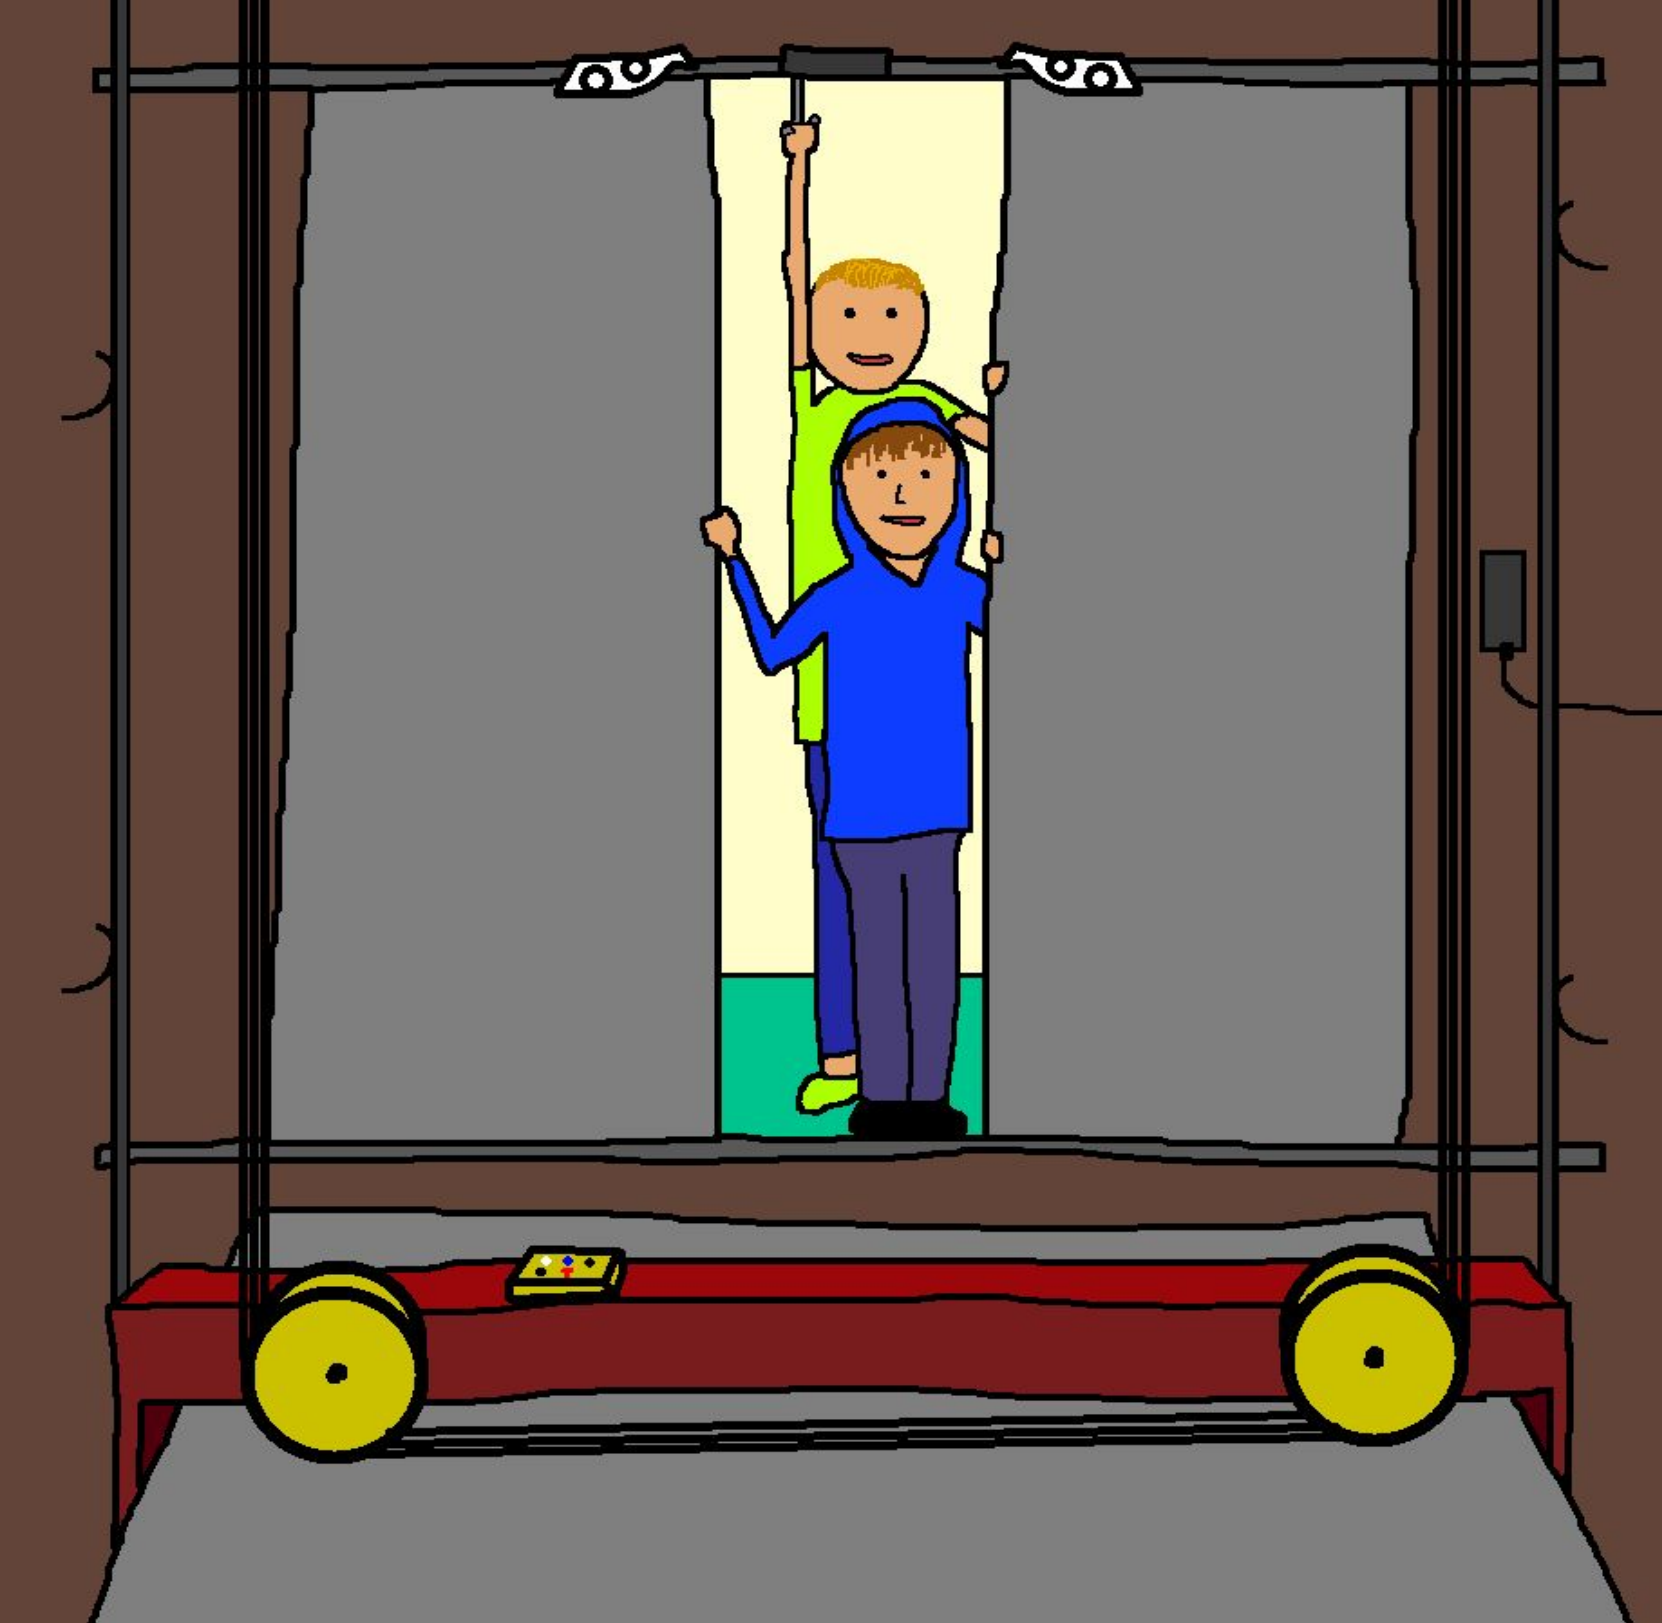

Went back to Grain sea fort for some abseiling.

Grain sea fort is deteriorating. The supports for the tower have deteriorated a lot and the tower will likely fall down eventually.

THE END
